

Finder

Seamless Journey Platform[®]

Unlock the future of passenger tracking

Finder is a cutting-edge solution designed specifically for Airlines and Airports, as well as other stakeholders in the travel industry. Permitting not only to know the last position of the passenger during the entire journey but also sharing additional data related to the journey, such as passenger ETA to the gate, that permits the users to make the best-informed decision possible, as well as innovative elements such as contacting the passenger whenever is needed to activate a customer or to accelerate awareness of something (e.g. boarding started).

Main Features

Biometric or not

Biometric and non biometric passengers are available.

Unlimited Search capabilities

The user can search by different inputs, such as flight, date, terminal, name, seat, etc

Last Known Position

The last know position is not in one place is now the entire journey, from mobile to boarding, giving to the user full control and capability to have the best informed decision

User-centered approach

Easy to use and to learn, Finder is a tool that was optimized to be implemented fast with minimum training, being user friendly and very visual, enables any user from any background to easily learn and start using it

Real-time monitoring

All information is real-time, enabling very efficient exposure of the latest data to the users

Contact the passenger

Finder also enables the user to in specific circumstances, and if consented by the passenger, to activate and interact with the passenger, providing the ultimate personalized service, enabling operations optimization to an entire new level
