Tempo

Seamless Journey Platform®

All your traveller flow performance at the distance of a click.

The **Tempo App** provides Business Intelligence and Management Information. This tool presents KPIs in a modern and dynamic approach, consuming all operational data of the border control transactions.

This business-driven, analytics platform allows Border Agencies to manage their border crossing operations and have a full view on the touchpoints activity by expansively exploring and combining data through appealing and interactive graphical representations.

Pre-Defined, shared visualization library

Predefined, shared visualization library: pick and choose from a library of visualization widgets the visualization most suited to your data.

User-Centric Approach

Displays real-time information updates in an easy to access and control visuals. Predefined and tailor-made dashboards and charts, to integrate border crossing and traveller data for an improved decision-making process.

Real-time Performance Statistics

Throughput
Transaction times
Touchpoint's usage
Biometric capture performance
Travel document authentication performance
Exception handling details
Other transaction details

Export Data

Export transaction data to local file for reporting capabilities.
